The Tree & Shrub sale has been offered for over 20 years! We offer a variety of native conifers, hardwoods, shrubs, and habitat plant seed to purchase at an affordable cost.

How to I Order Trees?

- Order forms get sent out with our newsletter in November. Call to get on the mailing list. You can also go to our website for an order form.
- Orders are due by mail or in person in mid January. We currently take cash or checks only. Payment is due with order.
- You will be notified by mail or by e-mail of the pick up date, which usually occurs in mid to late April.

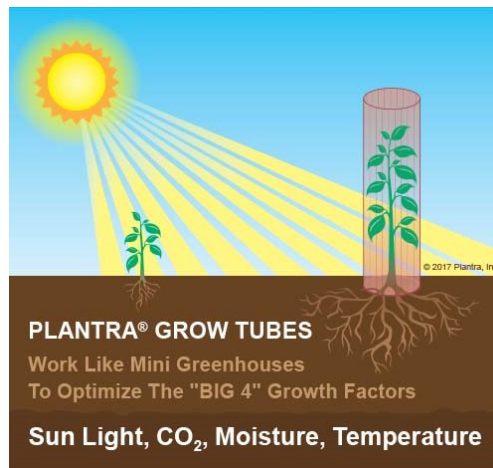

Please Note:

- Order early. Some trees may be popular or in short supply. If your selection is out, you will be notified and asked to substitute your choice.
- If you miss the deadline, you can be put on the list for extra trees.
- Non-sufficient fund checks will be returned with order form and no trees will be held. A \$30 NSF will be assessed.
- Please make arrangements with us or family/friends if you are able to make the pickup dates and times.

We also sell:

Root Gel. This helps retain water around tree roots during dry periods. This will help your new trees survive.

Tree Shelters. They are 4 foot plastic, seamless, twin-walled tubes. They protect seedlings from wildlife damage. They produce a greenhouse environment resulting in better survival and faster growth.

We rent out:

Tree Spades to help with planting

We work with Pheasants Forever to provide quality habitat seed designed for wildlife.

Seed mixes are available in a variety of sizes, different purposes, and diverse soil conditions.
